DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-21 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of U.S. Patent No. 6,451,088. Although the conflicting claims are not identical, they are not patentably distinct from each other because the step of incorporating at least one seeding agent which prevents the reactive process from passivating or encapsulating a metal value by urging at least one passivating or encapsulating species to at least crystallize, precipitate or otherwise form on or in proximity to the seeding agent as defined in the specification since the specification can always be used as a dictionary MPEP 804 II. B.

1. Obviousness-Type

Claims 1-21 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. Patent No. 6,626,979. Although the conflicting claims are not identical, they are not patentably

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Iler et al (US 4,399,109) and Weir (US 4,605,439) do not disclose or suggest a process for recovering a metal value comprising incorporating at least one seeding agent into the reactive process whereby partially preventing the reactive process from passivating or encapsulating at least one metal value by urging at least one passivating or encapsulating species to at least partially crystallize, precipitate or otherwise form on or in proximity to the seeding agent .
